CROP SOWING DATA* (All figures in Hectares)

State	Normal Area (No of yrs)	Area in 2024 (corresponding period)	Target	Sowing till date	Date of Update

* Statistical data of two other Guar growing states of Punjab and Haryana are not available

Till now the going is good, the sowing is in full swing. The areas under Guar are receiving another round of rain. As a reaction as we can see the market has colled down once again.

The demand from the food and oil drilling sectors is spread out with no spike in the demand pattern but there has definitely been a gradual overall increase.

Container availability has again become difficult. Sailings have become more and more erratic. In the monsoons we may see many blank / revised sailign schedules. In view of the delays in shipments we suggest to plan your purchases and shipment well in advance and with enough safety margin.

Nothing can be forecasted about the Guar market for sure. The market is controlled by speculators/traders.

We will keep you updated regarding the market situation as it develops. Please advise us your requirements so that we can calculate and advise you our best rates based on your indication regarding the Quantity, Quality and shipment period.
